

Congratulations! You have just purchased the cap that will make your days easier!

Notes on assembly:

- Insert the original gasket (if it is in bad condition, replace with a new one).  
Tip: for a secure fixation you can place a drop of glue or engine gasket paste (silicone based), to fix the gasket to the plug.
- Screw in the throttle cable tensioner. (if required)

Attention:

- **Lubricate the throttle cable** with Teflon grease or bearing grease. (Lack of lubrication could cause damage to the part).
- In case of cleaning please lubricate the throttle cable again.

Once installed.... **Enjoy!** See you on the track!
